

Published 8 August 2017 | By LRE Medical

LRE recently exhibited at the 69<sup>th</sup> AACC Annual Scientific Meeting & Clinical Lab Expo in San Diego, California USA. It is the world's largest exposition for clinical laboratory products and services with more than 750 companies exhibiting. Additionally, it is the world's premier gathering for laboratory medicine, with over 20,000 laboratory scientists and global leaders from a broad range of specialties (clinical chemistry, molecular diagnostics, mass spectrometry, translational medicine, lab management, and other areas of breaking science in laboratory medicine) in attendance. The AACC provided attendees with an opportunity to hear vital research and learn about important changes in the field with more than 200 educational opportunities in the form of lectures, plenary sessions, symposia, short courses, and roundtable sessions.

LRE used this opportunity to showcase some of its instrument solutions in-the-areas of *In Vitro* Diagnostics (IVD), Analytics, Life Sciences, and Medtech. The devices represented an array of products and technology and included examples of handheld, point-of-care, and laboratory instrumentation.

LRE Medical is an award-winning contract developer and manufacturer of IVD instrumentation for partnering companies. LRE offers “One Stop Shopping” solutions (engineering, manufacturing, after sales service and lifetime product support) for converting ideas into commercially successful products. We integrate a partnering company's assay “know-how” with our instrumentation expertise. For decades, companies that have partnered with us have received IVD instruments that were designed, developed, documented, manufactured, and delivered by LRE - with commercial success and without a single recall.

LRE is registered, certified and fully compliant with DIN EN ISO 13485, DIN EN ISO 14001, and FDA CFR Part 820 for Class I through Class III Medical Devices. LRE's instruments are competitively priced, yet manufactured with superior quality! For more information about LRE Medical and its services, please go to <http://www.lre.de/>.
