LRE recently exhibited at the Association for Molecular Pathology (AMP) 2017 Annual Meeting in Salt Lake City, Utah. The Association for Molecular Pathology is the leading organization in the field of molecular diagnostics, and its meeting was “the premier gathering” of molecular professionals with more than 200 exhibiting companies, 60 educational sessions, nearly 400 poster presentations, and 2,000+ attendees. The four-day event featured many cutting-edge lectures, corporate-sponsored workshops, and plenary sessions focusing on major areas of clinical molecular diagnostics.

LRE used this opportunity to showcase some of its instrument solutions in-the-areas of *In Vitro* Diagnostics (IVD), Analytics, Life Sciences, and Medtech. The products represented all phases of the product life cycle from specification to product development to manufacturing and finally after sales services and support.

LRE Medical is a leading developer and manufacturer of medical and IVD instrumentation for OEMs. LRE offers “One Stop Shopping” solutions for converting ideas into commercially successful products. We integrate a partnering customer’s assay “know-how” with our instrumentation expertise. For decades, our partnering customers have received commercially successful IVD instruments that were developed, documented, manufactured, and delivered by LRE –without a single recall. LRE is registered, certified and fully compliant with DIN EN ISO 13485, DIN EN ISO 14001, and FDA CFR Part 820 for Class I through Class III Medical Devices.

LRE’s instruments are competitively priced, yet manufactured with superior quality! For more information about LRE Medical and its services, please go to www.lre.de.
