Düsseldorf Fair Ground
Düsseldorf, Germany
13-Nov-2017 To 16-Nov-2017

MEDICA 2017 is the leading international trade fair for medical industry where latest technologies, knowledge sharing experience among thousands of participants will be explored. It is the once a year unique opportunity to meet professionals and research the current universal innovations of the medical industry at one stop.

LRE recently exhibited at Medica 2017 in Dusseldorf, Germany. It hosted nearly 6,000 exhibitors and over 120,000 professional visitors from around the world. It provided access to the latest in medical and information technology, laboratory equipment, diagnostics and physiotherapy.

LRE used this opportunity to showcase some of its instrument solutions in-the-areas of *In Vitro* Diagnostics (IVD), Analytics, Life Sciences, and Medtech. The products represented all phases of the product life cycle from specification to product development to manufacturing and finally after sales services and support.

Additionally, LRE introduced a prototype of its next generation compact Point-of-Care generic platform Reader (cPoC) for customer preview. The next generation cPoC Reader offers a new “State-of-the-Art” optical system, touchscreen GUI, and many more desired features.

LRE Medical is a leading developer and manufacturer of medical and IVD instrumentation for OEMs. LRE offers “One Stop Shopping” solutions for converting ideas into commercially successful products. We integrate a partnering customer’s assay “know-how” with our instrumentation expertise. For decades, our partnering customers have received commercially successful IVD instruments that were developed, documented, manufactured, and delivered by LRE –without a single recall. LRE is registered, certified and fully compliant with DIN EN ISO 13485, DIN EN ISO 14001, and FDA CFR Part 820 for Class I through Class III Medical Devices.

LRE’s instruments are competitively priced, yet manufactured with superior quality! For more
