Featuring KORRY Products

June 25, 2015

REACH Certificate of Compliance

The products of Esterline Control & Communication Systems – Korry are in compliance with EU Directive 1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). This includes Substances of Very High Concern identified on the candidate list through June 15, 2015.

All of our products are assemblies/components, not raw materials. Based on a review of supplier provided data for materials incorporated into Esterline Control Systems – Korry products, these products are designated as REACH compliant. REACH compliant means that:

- Our products are categorized as “articles” under the REACH Regulations.
- It is not intended that our products release substances during normal and reasonably foreseeable conditions of use.
- Regarding the Substances of Very High Concern (SVHC) candidate list, Esterline Control Systems – Korry products either 1) Do not contain more than 0.1% by weight per article of any substance on the SVHC candidate list or, 2) If a product is found to contain SVHCs above 0.1%, Korry notifies the recipients and works to reduce SVHC content as long as doing so will not affect product safety or reliability.

We will continue to monitor the status of the candidate list as part of our on-going compliance activities, including the need under Article 33 of REACH to inform product recipients and consumers if an article contains more than 0.1% by weight per article of any substance that is added to the SVHC candidate list in the future.
