FLANGED HOLE GROMMET

Flanged Hole Grommet for Irregular, Odd Shaped and Large Opening Chafe Protection

For use in Aircraft, Marine, Electronic, Automotive and other applications

Flanged hole grommets are an ideal solution for a variety of design and production problems. They enable grommeting of irregular, odd shaped or large holes, easily and quickly. They readily shape to line almost any shaped opening, offering excellent insulation. They also act as a chafe guard, protecting wire bundles, cable and tubing from sharp or jagged edges.

Flanged hole grommets are available in Nylon 6 and Nylon 6/6 materials for flexibility and durability. The standard stock length is 19.00" which can fit holes up to 6" in diameter.

Flanged hole grommets from NMC meet existing dimensions of current industry blueprints.

NMC has full engineering specifications available for all items shown here. Contact us for further information.

NMC G24- (Series)

FLANGED HOLE GROMMET

MATERIAL:**NYLON:**

G24N 6/6 nylon per ASTM D4066 (PA 0111)
(For applications to 275°F)

G24P 6 nylon per ASTM D4066 (PA 0211)
(For added flexibility)

TEMPERATURE LIMIT:

275°F

COLOR:

Natural

LENGTH (STD.):

Strip: Nylon – 19.00”

EXAMPLE OF PART NO.:

NMC G24 N or P 12 57

Basic Number	N for Nylon 6/6 P for Nylon 6	Inches	Decimal
-----------------	----------------------------------	--------	---------

ENGINEERING INFORMATION:

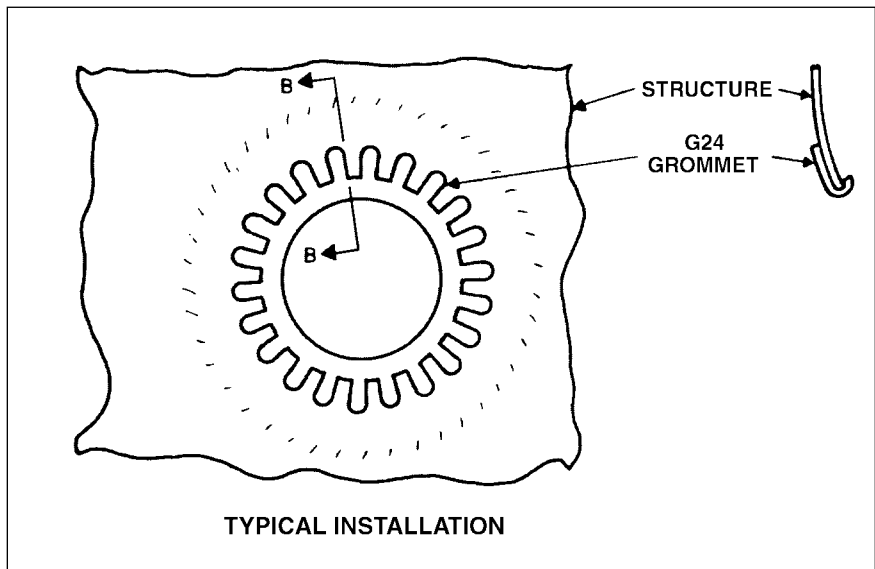

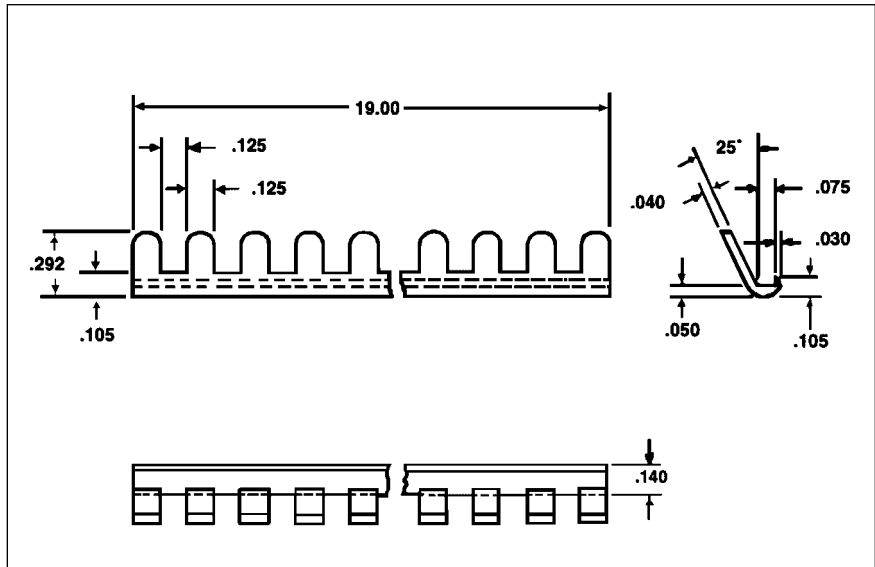

Flanged hole grommets are in strip form, intended to be cut to size.

“L” standard strip length:

NYLON 19” for up to 6” hole

Several lengths may be used to fit larger holes.

These grommets can be supplied pre-cut to your specifications.
