**ESTERLINE TO PRESENT HIGH-PERFORMANCE COMMUNICATIONS SYSTEMS,
PLUS SOFTWARE AND VISUALIZATION SOLUTIONS FOR SEA AND AIR PLATFORMS**

**First showing of Palomar Secure Communication Systems demonstration console
at Sea-Air-Space exposition, south of Washington D.C., April 3-5, Booth 2511**

EVERETT, Wash., March 29, 2017 — Esterline, global leader in aerospace technologies, will be displaying solutions from two of its business areas at Sea-Air-Space, the Navy League's Global Maritime Exposition, Gaylord National Convention Center, National Harbor, Md., April 3-5, Booth 2511. Exhibiting will be the Palomar and AVISTA brands of Esterline Control & Communication Systems, as well as the Codis brand of Esterline Advanced Displays.

Showcased by Esterline Control & Communication Systems will be its market-leading Palomar Secure Communication Systems (SCS) product line of integrated command, control and communications (C3) technology for secure, multi-level communications and information management. Featured for the first time will be a new demonstration console of Palomar SCS solutions. Also attending will be representatives from AVISTA engineering services, providing system engineering and software development for mission-critical systems.

Esterline Advanced Displays — with displays in service on U.S. Navy shipboard and aviation platforms — is a leading supplier of visualization technology to the U.S. Navy and will present its latest innovations in naval displays, video distribution, and remote crew station equipment. The Esterline booth will feature Codis FD and RFD-series displays with multi-touch control for surface-ship and submarine applications, as well as Codis RNA real-time network adapters for video distribution and real-time remote multi-desktop capabilities.

Esterline Corporation (NYSE: ESL) is an international specialized aerospace and defense company headquartered in Bellevue, Wash., that employs about 13,000 people worldwide. Its wholly owned subsidiary Esterline Control & Communication Systems (<http://www.esterline.com/controlandcommunication>) designs and produces leading technology control and communication components and subsystems for today's advanced requirements, focusing on delivering high-reliability human-machine interface (HMI) solutions to its customers across the globe.
